

A geometric diagram showing a triangle with an inscribed circle. The circle is tangent to the three sides of the triangle. The center of the circle is labeled with the Greek letter Δ (delta). Three lines, representing medians, are drawn from each vertex of the triangle to the midpoint of the opposite side, intersecting at the center Δ. The vertices are labeled with the Greek letter Λ (lambda) at the top, and the base is labeled with the Greek letter Ζ (zeta). The points where the medians intersect the sides are labeled with the Greek letter ε (epsilon) on the left and Η (eta) on the right.
